ECCE Writing

30' minutes

Modern technological inventions have invaded the school classrooms. There are interactive whiteboards, tablets for each student with internet access, websites with additional exercises, ebooks instead of printed workbooks to name but a few.

What is your opinion of all these invention in education? Do they promote or obstruct the learning process? Will the teachers eventually be replaced by some kind of software programme or even a human-like robot?

WRITE your opinion essay in 150-180 words.
