

Lesson 1

1. Atoms are bigger than molecules.
2. There are only five (5) states of matter.
3. Plasmas are horrible monsters in the Universe.
4. BEC was discovered in 1995.
5. A molecule is made up of two (2) atoms.
6. When you heat Solids you get Liquids.
7. When you cool gases you get Liquids.
8. BEC is “more solid” than solid.
9. Plasma is liquid.
10. When the water turns into ice we have a chemical change.

Well done!

Prepare your own presentation on the different forms of matter.
