

## **Lesson 1**

1. The inner core is between the crust and the mantle
2. The mantle is broken into pieces
3. The crust is broken into pieces
4. The crust is hot molten rock
5. The pieces of the crust are called tectonic plates
6. There are four (4) main tectonic plates
7. The tectonic plates float around on the mantle
8. When the tectonic plates push together a sea is created
9. The ocean crust is softer than the continental crust
10. Fault line is the line where two tectonic plates slide the one against the other.
