

Lesson 3

1. The asteroid belt sits between Saturn and Mars.
2. The asteroids are tiny objects the size of a pebble.
3. Ida is a small sun in the asteroid belt because it has moons around it.
4. Pluto belongs to Kuiper's belt.
5. The objects in Kuiper's belt are made of dust and gravity.
6. The comets are called white snowflakes.
7. The dust makes the comets dirty.
8. The frozen gas gives the comets a fantastic show of tail and light.
9. The Oort cloud surrounds Kuiper's belt.
10. Heliosphere is the biggest object in Oort cloud.
